Solutions for Medical Ventilators & Respiratory Care Equipment

Custom components that drive tomorrow's technologies.®

As a trusted supplier to medical device makers for over 60 years, Bal Seal Engineering has the products and resources you need to scale up design and manufacture of critical respiratory care equipment—fast. Whether you're seeking solutions for new projects or retrofitting existing platforms, our **collaborative engineering** process and **quick-turn prototyping** will help you keep up with demand during these challenging times.

Our Products

Bal Seal®

Bal Spring®

Bal Seal® spring-energized seals

for rotary, reciprocating, oscillating, static, and face sealing.

Bal Spring[®] canted coil springs

for mechanical connecting, (latching, locking, holding) electrical conducting, EMI/RFI shielding, and thermal management.

Our Process

In four simple steps, we can help you experience the improved reliability and enhanced performance that comes with using custom-engineered components.

ENGAGE

Our engineers gain a deep understanding of your application

DESIGN

Together, we engineer a solution that elevates your design

PROTOTYPE

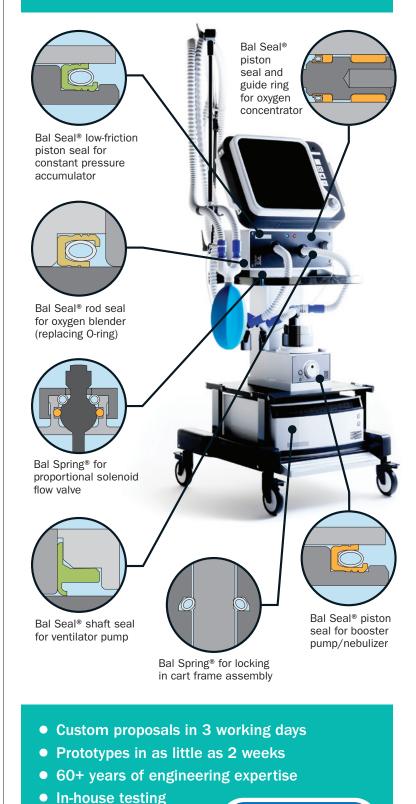

In as quickly as 2 weeks, you get a prototype

PRODUCE

You're ready to scale up, from tens to millions of pieces

Proven Success in Ventilator Applications
